

3. CONCLUSION

This report has covered reporting on the SDBIP as a way of linking the SDBIP with the oversight and monitoring operations of the Municipal administration. There is no doubt that the SDBIP has provided an excellent basis for generating the report for which MFMA requires. The report then will allow the Municipality to monitor the implementation of service delivery programs and initiatives across the District. However, we acknowledge that it is too early to conclude that the municipality is performing well in delivering it service delivery objectives for this financial year but nevertheless this report will serve as an early warning signal for areas showing underperformance.
